Languages: Portuguese, English **GitHub:** ltodarosouza **LinkedIn:** in/ltodarosouza

EDUCATION

Bachelor of Computer Science - Federal University of Paraíba (UFPB) 03/2026 - 12/2029 (expected)

PROJECTS

Rancho 05/2026 – Present

João Pessoa, Paraíba - Brazil

- Built and deployed **Rancho**, a full-stack agricultural management platform using **Next.js**, **TypeScript**, **Supabase** and **PostgreSQL** to manage livestock, milk production, inventory, finance, reproduction and employee operations.
- Architected an AI-powered conversational assistant using **Gemini** and **Claude**, a structured **ActionPlan** execution layer and backend validation, enabling natural-language registration and querying through the official **WhatsApp Cloud API**.
- Reduced the complexity of daily farm management by centralizing operational records and enabling users to register, monitor and query farm data through intuitive dashboards and safe, task-oriented natural-language WhatsApp interactions.

EXTRACURRICULAR ACTIVITIES

Researcher – ARIA Artificial Intelligence Laboratory 08/2026 – Present

Federal University of Paraíba – João Pessoa, Paraíba, Brazil

- Selected to participate in a research project conducted by **ARIA** in collaboration with the **University of Pennsylvania** and the **University of Bristol**, focused on applying deep learning to the automatic segmentation of breast tissue in digital breast tomosynthesis images.
- Supporting research activities involving machine learning, computer vision, medical image processing, experimentation, and analysis of model results; using Claude to support literature synthesis and technical communication.

Trainee – Trilha 06/2026 – Present

Federal University of Paraíba – João Pessoa, Paraíba, Brazil

- Selected** as one of **20 trainees** from a pool of **more than 100 applicants** for Trilha’s software development program.
- Developing programming, problem-solving, algorithms, and software engineering skills through structured learning activities, peer knowledge-sharing, and mentorship with experienced software developers.

Academic Mentor - Colégio Motiva 02/2026 – Present

João Pessoa, Paraíba, Brazil

- Mentored high school students preparing for **ENEM** (Brazilian national college entrance exam), helping them organize study plans, track progress, and improve learning routines; explored responsible AI-supported study practices with Claude.
- Developed strong communication, planning, mentoring, and time management skills through individual student follow-up.

AWARDS

Builders’ Club – Fundação Behring 07/2026

- Selected to participate in an entrepreneurship and technology event focused on collaborative problem-solving and the development of impactful solutions.
- Collaborated with a team to design a data-driven solution for improving medication management in Brazilian hospitals, aiming to reduce waste, anticipate shortages, and optimize internal processes.

Gold Medal – Mathematical Kangaroo Competition (Brazil) 01/2025

- Awarded a gold medal in the Brazilian edition of the international Mathematical Kangaroo competition.

SKILLS

Languages: TypeScript, JavaScript, Python, C, HTML, CSS | **Tools & Platforms:** Supabase, Git, Claude, Gemini | **Specialized:** RESTful APIs, LLM Integration, AI Fluency, Responsible AI, Machine Learning, Deep Learning, Computer Vision, Medical Image Processing
